

journal of american geriatric society

journal of american geriatric society stands as a leading publication dedicated to advancing the field of geriatrics through rigorous scientific research, clinical insights, and policy analysis. As the official journal of the American Geriatrics Society, it provides healthcare professionals, researchers, and policymakers with vital information on aging-related health issues, treatment innovations, and best practices for elder care. This journal serves as a critical platform for disseminating evidence-based knowledge aimed at improving the quality of life for older adults. With a comprehensive scope covering diverse topics such as chronic disease management, geriatric syndromes, dementia care, and health services research, the Journal of American Geriatric Society plays an instrumental role in shaping geriatric medicine. This article explores the journal's history, its editorial process, content focus, and its impact on the broader medical community. Readers will also gain insights into how to access, contribute to, and utilize this essential resource for advancing geriatric healthcare.

History and Background of the Journal of American Geriatric Society

The Journal of American Geriatric Society (JAGS) was established to provide a dedicated outlet for research and clinical findings related to the health and well-being of older adults. Since its inception, the journal has evolved alongside the field of geriatrics, reflecting advancements in medical knowledge, technology, and healthcare delivery. It is published monthly and serves as the official publication of the American Geriatrics Society (AGS), a prominent professional organization committed to improving the care of older persons. Over the decades, the journal has expanded its reach internationally, attracting submissions from leading geriatricians and interdisciplinary experts worldwide. This growing influence underscores its importance as a resource for evidence-based geriatric practice and policy development.

Scope and Content Focus

The journal of american geriatric society covers a broad range of topics related to aging and elder care, emphasizing clinically relevant research and practical applications. It includes original

research articles, systematic reviews, clinical guidelines, case reports, and policy analyses. The scope encompasses various aspects of geriatrics such as chronic disease management, cognitive impairment, functional decline, pharmacotherapy, mental health, palliative care, and healthcare systems for older adults.

Key Areas of Research

Research areas frequently featured in the journal include:

- Geriatric syndromes including frailty, falls, and delirium
- Dementia and neurodegenerative diseases
- Chronic illness management tailored for older adults
- Medication safety and polypharmacy
- Health disparities and social determinants of aging
- Innovations in long-term and home-based care

Clinical Practice and Guidelines

In addition to research, the journal publishes clinical practice guidelines and consensus statements developed by the AGS and other expert panels. These guidelines provide evidence-based recommendations for practitioners, helping to standardize and improve the quality of geriatric care across various clinical settings.

Editorial Process and Peer Review

The journal of american geriatric society maintains a rigorous editorial process to ensure the quality, validity, and relevance of published content. Manuscripts submitted to the journal undergo a structured peer review by experts in geriatrics and related fields. This process includes initial editorial screening, anonymous peer review, revisions, and final acceptance decisions.

Submission and Review Workflow

Once a manuscript is submitted, it is first evaluated by the editorial team for suitability and adherence to the journal's scope. Suitable manuscripts are then sent to two or more peer reviewers who assess the scientific merit, methodological soundness, and clinical significance. Authors receive detailed feedback and may be required to revise their work before final acceptance.

Ethical Standards and Transparency

The journal adheres to strict ethical guidelines to prevent conflicts of interest, plagiarism, and data fabrication. Transparency in reporting and adherence to research ethics are mandatory for all submissions, contributing to the integrity and trustworthiness of the published literature.

Impact and Influence in Geriatric Medicine

The journal of american geriatric society holds a prominent position within the medical community, significantly influencing geriatrics research, education, and clinical practice. It is widely cited and respected for its authoritative content and its role in shaping standards of care for aging populations.

Academic and Clinical Impact

Many studies published in the journal have led to improved diagnostic methods, therapeutic approaches, and healthcare policies targeting older adults. Its articles often serve as foundational references for further research and are incorporated into medical education curricula focusing on geriatrics.

Role in Policy and Advocacy

The journal also plays a critical role in informing policymakers and healthcare administrators about emerging challenges and solutions in elder care. Through its policy analyses and expert consensus statements, it helps guide national and international efforts to optimize healthcare services for the elderly.

Accessing and Utilizing the Journal

Access to the journal of american geriatric society is available through institutional subscriptions, individual memberships in the American Geriatrics Society, and digital platforms. It provides both print and online editions, with an extensive archive of past issues.

Subscription and Membership Benefits

Subscribers and AGS members benefit from full access to all articles, early online publication, and supplemental materials such as clinical tools and educational resources. The journal's website offers advanced search capabilities and options for article alerts to stay updated on the latest research.

Using the Journal for Research and Clinical Practice

Healthcare professionals utilize the journal as a primary source for evidence-based information to inform clinical decisions and improve patient outcomes. Researchers consult it for current trends,

methodologies, and gaps in geriatric knowledge, facilitating the advancement of the field.

Contributing to the Journal of American Geriatric Society

Contributions to the journal are encouraged from a diverse range of professionals including physicians, nurses, social workers, and researchers specializing in aging. The journal welcomes original research, reviews, clinical reports, and commentaries that advance the understanding of geriatric health.

Manuscript Preparation and Submission

Authors are required to follow detailed submission guidelines regarding manuscript structure, formatting, and ethical compliance. Clear presentation of data, adherence to reporting standards, and relevance to geriatric populations are emphasized to enhance the quality and impact of submissions.

Opportunities for Early-Career Researchers

The journal supports emerging scholars by providing mentorship opportunities, special issues focused on innovative research, and recognition through awards. This fosters the development of new voices in geriatrics and encourages ongoing contributions to the scientific community.

Frequently Asked Questions

What is the focus of the Journal of the American Geriatrics Society?

The Journal of the American Geriatrics Society focuses on research, clinical practice, and policy related to the health and care of older adults.

How often is the Journal of the American Geriatrics Society published?

The Journal of the American Geriatrics Society is published monthly.

Is the Journal of the American Geriatrics Society peer-reviewed?

Yes, the Journal of the American Geriatrics Society is a peer-reviewed medical journal.

Where can I access articles from the Journal of the American Geriatrics Society?

Articles from the Journal of the American Geriatrics Society can be accessed through Wiley Online Library and other academic databases.

What types of articles are published in the Journal of the American Geriatrics Society?

The journal publishes original research, reviews, clinical reports, and policy analyses related to geriatrics and gerontology.

Who is the target audience for the Journal of the American Geriatrics Society?

The target audience includes geriatricians, researchers, healthcare professionals, and policymakers involved in the care of older adults.

Additional Resources

1. *Principles and Practice of Geriatric Medicine*

This comprehensive book covers the fundamental aspects of geriatric medicine, addressing the unique health challenges faced by older adults. It integrates clinical practice with the latest research, providing guidance on managing common geriatric syndromes, chronic diseases, and functional decline. The text is designed for healthcare providers who aim to improve quality of life in the elderly population.

2. *Geriatric Medicine: An Evidence-Based Approach*

Focusing on evidence-based strategies, this book offers practical insights into the diagnosis and management of age-related conditions. It emphasizes the importance of individualized care plans and multidisciplinary approaches in geriatric healthcare. Readers will find detailed discussions on pharmacology, mental health, and preventive care tailored to older adults.

3. *Essentials of Clinical Geriatrics*

A concise yet thorough guide, this book distills key information relevant to clinical geriatrics. It covers a broad spectrum of topics including cognitive disorders, mobility issues, and end-of-life care. Ideal for both students and practicing clinicians, it supports effective decision-making in complex geriatric cases.

4. *Geriatric Psychiatry: A Case-Based Approach*

This text delves into the psychiatric aspects of aging, exploring mood disorders, dementia, and behavioral issues in elderly patients. Using case studies, it illustrates diagnostic challenges and therapeutic interventions. The book is a valuable resource for psychiatrists, geriatricians, and mental health professionals.

5. *Handbook of Geriatric Assessment*

Providing practical tools for comprehensive geriatric evaluation, this handbook guides clinicians through functional, cognitive, and psychosocial assessments. It emphasizes the importance of a

holistic approach to understand the multifaceted needs of older adults. The book includes standardized assessment scales and protocols.

6. Nutrition and Aging: Assessment and Treatment of Nutritional Problems in Older Adults

This book addresses the critical role of nutrition in healthy aging, detailing common nutritional deficiencies and their impact on morbidity. It offers strategies for assessment and intervention tailored to the elderly, considering physiological changes and chronic illnesses. Healthcare providers will find evidence-based recommendations to optimize nutritional care.

7. Pharmacotherapy in the Elderly: A Focus on the Journal of the American Geriatrics Society

Centered on medication management, this book reviews the complexities of pharmacotherapy in older patients, including polypharmacy and adverse drug reactions. It draws extensively from research published in the Journal of the American Geriatrics Society to highlight best practices. Clinicians will benefit from its guidance on safe prescribing and monitoring.

8. Falls and Mobility in the Elderly: Prevention and Management

This book explores the causes and consequences of falls among the elderly, a leading cause of injury and disability. It provides evidence-based interventions for assessment, prevention, and rehabilitation to enhance mobility and reduce fall risk. The text is essential for geriatricians, physical therapists, and caregivers.

9. Ethical Issues in Geriatric Care

Focusing on the ethical dilemmas encountered in caring for older adults, this book discusses topics such as autonomy, consent, and end-of-life decision making. It encourages thoughtful reflection and provides frameworks for resolving complex situations. Healthcare professionals will find it a valuable guide for promoting dignity and respect in geriatric care.
