

levo gummy mixer instructions

Levo gummy mixer instructions are essential for anyone looking to create homemade cannabis-infused gummies. The LEVO II is a popular machine designed to simplify the infusion process, allowing users to craft their own flavored edibles with ease. This article will guide you through the complete process of using the LEVO gummy mixer, from preparation to enjoying your delicious creations.

Getting Started with the LEVO Gummy Mixer

Before diving into the actual mixing and infusion process, it's important to understand the components of the LEVO gummy mixer and gather the necessary supplies.

What You Need

To create your own gummies using the LEVO gummy mixer, you'll need the following items:

- LEVO II infusion machine
- Gummy molds (silicone works best)
- Cannabis or herb of choice for infusion
- Flavorings (such as fruit juice, extracts, or powders)
- Sweeteners (sugar, honey, or agave syrup)
- Gelatin or pectin (for gummy texture)
- Measuring cups and spoons
- Mixing bowl
- Stirring utensil
- Dropper or pipette (for filling molds)

Preparing Your Ingredients

1. **Decarboxylate Your Cannabis:** Before infusing, you need to decarboxylate your cannabis to activate the THC. Preheat your oven to 245°F (120°C). Spread your ground cannabis evenly on a baking sheet and bake for 30-40 minutes, stirring occasionally.
2. **Measure Your Ingredients:** Depending on your desired potency, measure out the appropriate amount of decarboxylated cannabis. A general recommendation is 1 cup of oil for every 7-10 grams of cannabis.
3. **Choose Your Flavor and Sweetener:** You can use natural fruit juices or flavored extracts according to your preference. Select a sweetener that complements your chosen flavor.

Infusing Oil with the LEVO Mixer

Once your ingredients are prepared, it's time to infuse the oil using the LEVO II.

Infusion Process Steps

1. **Fill the Reservoir:** Open the LEVO machine and fill the reservoir with your chosen oil (coconut oil, olive oil, or any other oil that fits your needs).
2. **Add the Cannabis:** Place your decarboxylated cannabis in the herb pod and insert it into the reservoir. Make sure it's securely in place.
3. **Select Infusion Settings:** On the LEVO machine, select the temperature (typically between 160°F to 200°F) and infusion time (up to 8 hours). The LEVO app can help you fine-tune these settings based on your specific recipe.
4. **Start the Infusion:** Press the start button and let the LEVO do its magic. The machine will heat the oil and circulate it around the herb pod, extracting cannabinoids and terpenes.
5. **Wait for the Process to Complete:** Once the infusion is done, the machine will notify you. Allow the oil to cool slightly before removing the herb pod.

Making the Gummy Mixture

With your infused oil ready, it's time to create the gummy mixture.

Gummy Base Ingredients

For a basic gummy recipe, you will need:

- 1 cup of infused oil (from LEVO)
- 1 cup of fruit juice (or flavored liquid)
- 1/4 cup of sweetener
- 2 tablespoons of gelatin or pectin

Mixing Instructions

1. Combine Ingredients: In a mixing bowl, combine the infused oil, fruit juice, and sweetener. Mix well until the sweetener is fully dissolved.
2. Add Gelatin or Pectin: Gradually sprinkle the gelatin or pectin over the mixture while continuously stirring. This helps to avoid clumps. Let it sit for about 5-10 minutes to bloom.
3. Heat the Mixture: If using gelatin, gently heat the mixture in a saucepan over low heat, stirring continuously until the gelatin is fully dissolved. If using pectin, follow the package instructions for proper heating.
4. Remove from Heat: Once the mixture is smooth and well combined, remove it from the heat.

Filling the Gummy Molds

Now comes the fun part—filling your gummy molds!

Steps for Molding Gummies

1. Prepare Your Molds: Lightly oil your silicone molds to prevent sticking. This step is optional but can make removal easier.
2. Transfer the Mixture: Using a dropper or pipette, carefully fill each mold with the gummy mixture. Be sure to fill them to the top without overflowing.
3. Chill to Set: Place the filled molds in the refrigerator for at least 30-60 minutes or until the gummies are firm.

Storing and Enjoying Your Gummies

Once your gummies are set, it's time to enjoy them!

Storage Tips

- **Keep Them Fresh:** Store your gummies in an airtight container in the refrigerator for up to two weeks. For longer storage, you can freeze them.
- **Avoid Excess Moisture:** Ensure your storage container is dry to prevent the gummies from becoming sticky.

Serving Suggestions

- **Dosage Control:** Start with a small amount to gauge your tolerance, especially if you're new to cannabis edibles.
- **Pair with Other Treats:** Gummies can be enjoyed on their own or paired with other snacks for a fun experience.

Final Thoughts

Creating your own cannabis-infused gummies using the LEVO gummy mixer is an enjoyable and rewarding process. By following these **levo gummy mixer instructions**, you can craft personalized edibles tailored to your taste and potency preferences. Remember to always consume responsibly and keep your creations out of reach of children. Enjoy the journey of making your own gourmet gummies!

Frequently Asked Questions

What is the Levo Gummy Mixer used for?

The Levo Gummy Mixer is used to create infused gummy candies by blending oils, flavors, and gelatin in a precise manner.

How do I prepare my ingredients for the Levo Gummy Mixer?

Start by measuring your desired amount of gelatin, flavorings, and infused oils. It's best to have all ingredients ready before starting the mixing process.

What are the basic steps to use the Levo Gummy Mixer?

1. Add your gelatin and cold water to the mixer. 2. Heat the mixture until gelatin dissolves. 3. Mix in your infused oil and flavors. 4. Pour into molds and let set.

Can I use the Levo Gummy Mixer for different gummy recipes?

Yes, you can customize your gummy recipes by altering the flavors, colors, and types of infused oils used in the mixture.

How long does it take for gummies to set in the Levo Gummy Mixer?

Typically, gummies take about 30 minutes to set in the refrigerator after pouring into molds, but it may vary depending on the recipe.

Is the Levo Gummy Mixer easy to clean?

Yes, the Levo Gummy Mixer is designed for easy cleaning. Most parts are removable and dishwasher safe, making cleanup simple.

Can I adjust the sweetness of my gummies in the Levo Gummy Mixer?

Absolutely! You can adjust the sweetness by adding more or less sugar or using sweeter flavorings, according to your taste preferences.

What types of oils can I use with the Levo Gummy Mixer?

You can use various infused oils, such as cannabis oil, coconut oil, or any other flavored oils that complement your gummy recipe.

Do I need special molds for the gummies made with the Levo Gummy Mixer?

While you don't need special molds, using silicone molds is recommended for easier removal of the gummies once they've set.

Where can I find more recipes for the Levo Gummy Mixer?

You can find more recipes on the official Levo website, social media pages,

and various cooking blogs dedicated to gummy candy making.
