Understanding Sardá y Salvany's Context

To understand why liberalism is a sin in the eyes of Sardá y Salvany, it is essential to analyze the socio-political landscape of 19th-century Europe, particularly Spain.

The Rise of Liberalism

1. Historical Background:

- The 19th century was marked by the rise of liberalism, which emphasized individual rights, freedom of thought, and secular governance.
- Revolutions, such as the French Revolution of 1789, challenged the established order, leading to the decline of monarchies and the Church's influence.

2. Philosophical Underpinnings:

- Liberalism was rooted in Enlightenment ideas, promoting reason and empirical evidence over faith and tradition.
- Philosophers like John Locke and Jean-Jacques Rousseau championed the rights of individuals, laying the groundwork for modern democratic states.

3. Catholic Response:

- In response to the growing liberal ideology, the Catholic Church sought to reaffirm its doctrines and resist secularization.
- The First Vatican Council (1869-1870) underscored the Church's authority and its opposition to liberal thought.

Sardá y Salvany's Critique of Liberalism

Sardá y Salvany articulated a robust critique of liberalism, framing it as a moral and spiritual threat to society and the Church.

1. Moral Relativism:

- According to Sardá y Salvany, liberalism promotes moral relativism, undermining absolute truths rooted in divine revelation.
- This relativism leads individuals away from the teachings of the Church and towards a self-centered worldview.

2. Separation of Church and State:

- Sardá y Salvany argued that liberalism's push for the separation of Church and State effectively marginalizes religious influence in public life.
- He believed that this separation leads to a deterioration of moral values and societal cohesion.

3. Individualism vs. Community:

- The liberal emphasis on individual rights often comes at the expense of community and social responsibility.
- Sardá y Salvany posited that a focus on individualism fosters selfishness and alienation rather than a spirit of solidarity.

The Theological Basis for "Liberalism is a Sin"

Sardá y Salvany grounded his arguments in Catholic theology, emphasizing the importance of faith in shaping moral and ethical behavior.

Divine Law vs. Human Law

1. Transcendent Moral Order:

- Sardá y Salvany believed that divine law, as revealed through Scripture and Tradition, is superior to human-made laws.
- He argued that liberalism, by prioritizing human reason over divine revelation, leads to laws that contradict God's will.

2. Sinfulness of Disobedience:

- For Sardá y Salvany, failing to acknowledge God's authority in societal governance constitutes a grave sin.
- He maintained that liberalism encourages disobedience to divine commands, leading individuals away from salvation.

The Role of the Church

1. Guardianship of Morality:

- Sardá y Salvany viewed the Church as the guardian of moral truth, tasked with guiding the faithful against the encroachments of liberalism.
- He argued that the Church must actively defend its teachings and intervene in societal matters to preserve moral order.

2. Unity of Faith and Reason:

- Contrary to the liberal notion of a conflict between faith and reason, Sardá y Salvany posited that true reason leads one to embrace faith.
- He believed that the pursuit of truth cannot be divorced from a relationship with God.

Sardá y Salvany's work had significant repercussions within the Catholic Church and broader society.
