Assembling the Frame

Begin by attaching the side panels to the bottom panel. Insert wooden dowels into the designated holes and secure the pieces using screws as specified in the instruction manual. Ensure that edges align perfectly to maintain structural integrity. Next, attach the

Installing the Back Panel

It is important to ensure the back panel is flush and fully attached, as this prevents wobbling and enhances durability.

Drawer Assembly

Each of the four drawers requires individual assembly before being inserted into the dresser frame. Attach the drawer sides to the drawer front, aligning pre-drilled holes and securing with screws or cam-lock fasteners. Next, fit the drawer bottom into grooves along the sides and front panels. Finally, attach the drawer back panel to complete the assembly.

Attaching Drawer Handles and Installing Drawers

Once the drawers are fully assembled, attach the handles using screws provided, ensuring they are level and firmly fixed. Slide the drawers into the dresser frame along the pre-installed runners or grooves. Test each drawer for smooth operation and adjust if necessary to prevent sticking or misalignment.

Missing or Damaged Parts

Drawer Sticking or Difficult to Open

Drawers that stick or resist opening may be due to improper installation or swelling of wood components. Inspect the drawer tracks or runners for obstructions, and ensure the drawer is correctly seated. Lightly sanding the edges of the drawer bottom or sides can sometimes alleviate tight fits.
