Sample Questions and Detailed Answers

Providing sample math for marines test 1 answers with explanations can clarify the problem-solving process and reinforce understanding. Below are examples of typical questions along with step-by-step solutions.

Sample Question 1: Arithmetic

Calculate 25% of 240.

Answer: To find 25% of 240, convert the percentage to a decimal (0.25) and multiply:

$$0.25 \times 240 = 60$$

The answer is 60.

Sample Question 2: Algebra

Solve for x: $3x + 7 = 22$.

Answer: Subtract 7 from both sides:

$$3x = 22 - 7$$

$$3x = 15$$

Divide both sides by 3:

$$x = 15 / 3 = 5$$

The solution is $x = 5$.

Sample Question 3: Geometry

Find the area of a triangle with a base of 10 units and a height of 6 units.

Answer: Use the formula for the area of a triangle:

$$\text{Area} = (1/2) \times \text{base} \times \text{height}$$

$$\text{Area} = (1/2) \times 10 \times 6 = 30 \text{ square units}$$

Sample Question 4: Word Problem

A Marine walks 3 miles east, then 4 miles north. What is the straight-line distance from the starting point?

Answer: Use the Pythagorean theorem:

$$\text{Distance} = \sqrt{(3^2 + 4^2)} = \sqrt{(9 + 16)} = \sqrt{25} = 5 \text{ miles}$$
