Background and Publication History

The novel **maurice em forster** was written between 1913 and 1914 but was not published until 1971, several years after Forster's death. The delay in publication was primarily due to the novel's candid depiction of homosexual relationships, which were illegal and socially stigmatized in Edwardian England. Forster chose to keep the manuscript private during his lifetime, aware of the potential repercussions of releasing such material publicly. The posthumous publication of *Maurice* marked a significant moment in literary history, as it was one of the first English novels to treat homosexuality with empathy and as a natural aspect of human experience.

Historical Context of the Novel

Set in the early 20th century, *Maurice* reflects the social and legal challenges faced by gay men during this period. Homosexual acts were criminal offenses under laws such as the Labouchere Amendment, and public attitudes were largely condemning. Forster's decision to write *Maurice* was both a personal and political act, confronting these oppressive norms through fiction. The novel's setting in Edwardian England provides a backdrop against which the characters navigate societal expectations and personal desires.
