1. Chemical and Physical Foundations of Biological Systems

- This section tests your knowledge of chemistry, physics, and biology.
- Topics include:
 - Biochemistry
 - General chemistry
 - Organic chemistry
 - Physics

2. Critical Analysis and Reasoning Skills (CARS)

- This section evaluates your reading comprehension and analytical skills.
- Focuses on:
 - Understanding complex texts
 - Analyzing arguments
 - Evaluating evidence

3. Biological and Biochemical Foundations of Living Systems

- This section emphasizes biology and biochemistry.
- Key topics include:
 - Cellular biology
 - Molecular biology
 - Genetics

4. Psychological, Social, and Biological Foundations of Behavior

- This section assesses your understanding of psychological and sociocultural factors.
- Areas of focus include:
 - Developmental psychology
 - Social psychology
 - Behavioral science

Each section is scored on a scale of 118 to 132, with a total score ranging from 472 to 528.

- Use spaced repetition techniques to enhance retention.

Essential MCAT Topics to Review

While the MCAT covers a wide array of subjects, certain topics tend to be more heavily tested. Here's a breakdown of some essential areas to focus on:

1. Biology

- Cell structure and function
- Human anatomy and physiology
- Genetics and evolution

2. Chemistry

- Chemical reactions and stoichiometry
- Thermodynamics and kinetics
- Organic chemistry mechanisms

3. Physics

- Mechanics (forces, motion, energy)
- Waves and optics
- Electricity and magnetism

4. Psychology and Sociology

- Social behavior and group dynamics
- Cultural influences on behavior

Quick Reference MCAT Cheat Sheet

Creating a quick reference cheat sheet can help you recall essential concepts during your studies. Here's a concise overview of key points to include:

1. Formulas and Constants

- Ideal Gas Law: $PV = nRT$
- Newton's Second Law: $F = ma$
- Wave Speed Formula: $v = f\lambda$

2. Biological Processes

- Cellular Respiration:
- Glycolysis → Krebs Cycle → Electron Transport Chain
- Mitosis and Meiosis:
- Mitosis (somatic cells) vs. Meiosis (gametes)

3. Important Reactions in Organic Chemistry

- SN1 vs. SN2 Reactions:
- SN1 (unimolecular nucleophilic substitution) is 2 steps; SN2 (bimolecular) is 1 step and involves inversion.
- Functional Groups:
- Alcohols, carboxylic acids, amines, ethers, etc.

4. Psychological Theories

- Maslow's Hierarchy of Needs: Physiological, Safety, Love/Belonging, Esteem, Self-Actualization
