Understanding Sun Signs

Sun signs are perhaps the most well-known aspect of astrology. When people refer to their zodiac sign, they are usually talking about their sun sign. This sign is determined by the position of the sun at the time of one's birth and is associated with the following characteristics:

- **Core Identity:** The sun sign reflects our fundamental nature, ego, and identity.
- **Behavior:** It influences how we express ourselves and interact with others.
- **Life Purpose:** The sun sign often indicates what we aspire to achieve in life.

Each sun sign is associated with specific traits and tendencies, influenced by the twelve zodiac signs:

4. Cancer (June 21 - July 22): Nurturing, sensitive, and protective.
5. Leo (July 23 - August 22): Confident, charismatic, and generous.
6. Virgo (August 23 - September 22): Analytical, detail-oriented, and modest.

The sun sign is a crucial aspect of one's astrological profile, often reflecting how we present ourselves to the world and the qualities we exhibit in social situations.
