Step 1: Organize Your Pieces

1. Unbox the Puzzle: Carefully open the box and take out all the pieces.
2. Sort the Pieces: Organize them by shape and color. This will make it easier to find the pieces you need as you work through the assembly.

Step 2: Start Assembling the Base

1. Identify the Base Pieces: Look for the larger pieces that will form the base of the dragon.
2. Connect the Base Pieces: Start by connecting the base pieces together. Ensure each piece clicks into place securely.
3. Check Stability: Once the base is assembled, gently shake it to ensure that it is stable before proceeding.

Step 3: Build the Body

2. Assemble in Sections: It might be easier to assemble the body in sections (e.g., torso, neck) before attaching them to the base.
3. Ensure Proper Fit: Each piece should fit snugly against the others. If a piece doesn't seem to fit, double-check to ensure you're using the correct piece.

Step 4: Create the Head and Tail

1. Focus on the Head: The head is often the most intricate part. Identify the pieces that form the dragon's face and ensure you have the correct orientation.
2. Attach the Head: Once the head is assembled, attach it to the body.
3. Construct the Tail: Assemble the tail using the remaining pieces and attach it to the back of the body.

Step 5: Add the Finishing Touches

1. Attach Wings and Other Features: If your dragon has wings or other decorative features, now is the time to attach them.

2. Double-Check Assembly: Ensure all pieces are securely connected and the dragon holds its shape.
