Additionally, players assign skill proficiencies and select feats that enhance their character's capabilities. This systematic approach ensures that each character uniquely contributes to the narrative and tactical aspects of the game.

Ability Scores and Ancestry

Ability scores in Pathfinder 2e determine a character's physical and mental attributes, including Strength, Dexterity, Constitution, Intelligence, Wisdom, and Charisma. Players allocate points using a predetermined method, often the standard array or point-buy system. The choice of ancestry influences ability modifiers and grants special traits, making it a critical decision during character creation. Understanding how these scores interact with the character's chosen class and role is

essential for optimizing performance in various scenarios.
