

primo water dispenser 90013 manual

Primo Water Dispenser 90013 Manual is an essential guide for users who want to get the most out of their water dispensing appliance. This model is designed to provide convenient access to hot, cold, and room-temperature water, making it ideal for families, offices, and anyone who values hydration. This article will delve into the features, setup, maintenance, troubleshooting, and additional tips for using the Primo Water Dispenser 90013 effectively.

Overview of the Primo Water Dispenser 90013

The Primo Water Dispenser 90013 is a versatile appliance that caters to various hydration needs. It is engineered to accommodate 3- or 5-gallon water bottles, making it a flexible solution for different water consumption patterns. With its sleek design and efficient functionality, this water dispenser is suitable for various environments, whether at home or in the workplace.

Key Features

1. Three Temperature Settings:

- Hot
- Cold
- Room Temperature

2. Child Safety Lock:

- Ensures safety for households with young children by preventing accidental hot water dispensing.

3. Easy Loading System:

- The top-loading design allows for straightforward installation of water bottles, making it convenient for users.

4. Energy Efficient:

- Designed to minimize energy consumption while providing optimal performance.

5. Built-in Night Light:

- Provides visibility in low-light conditions, adding to usability during nighttime.

Setting Up the Primo Water Dispenser 90013

Setting up your Primo Water Dispenser 90013 is straightforward. Follow these steps to ensure proper installation:

Unboxing Your Dispenser

1. Carefully remove the dispenser from the packaging.
2. Inspect the unit for any damage that may have occurred during shipping.
3. Ensure all components are included, typically consisting of:
 - The water dispenser
 - User manual
 - Any additional accessories (if applicable)

Choosing the Right Location

- Select a stable surface that can support the weight of the dispenser and the water bottle.
- Ensure the location is near an electrical outlet for easy plug-in.
- Avoid direct sunlight and heat sources to maintain the integrity of the dispenser.

Loading the Water Bottle

1. Open the top lid of the dispenser.
2. Position the water bottle upside down on the dispensing area.
3. Press down firmly to puncture the seal and ensure a tight fit.
4. Close the lid securely.

Powering On the Dispenser

1. Plug the dispenser into a power outlet.
2. Allow the unit to preheat for approximately 15-30 minutes before using hot water.
3. The cold water reservoir may take a bit longer to reach optimal cooling temperatures.

Using the Primo Water Dispenser 90013

Once your Primo Water Dispenser is set up, using it is simple and user-

friendly.

Dispensing Water

- To dispense hot water, press the hot water button, ensuring the child safety lock is engaged for safety.
- For cold water, press the cold water button.
- For room temperature water, simply pull the lever or button designated for room temperature.

Understanding the Control Panel

- The control panel typically includes:
- Hot water button
- Cold water button
- Room temperature button
- Child safety lock indicator
- Power indicator light

Maintenance of the Primo Water Dispenser 90013

Regular maintenance is crucial for ensuring the longevity and efficiency of your water dispenser.

Cleaning the Dispenser

- Exterior Cleaning:
- Use a soft cloth and mild detergent to clean the exterior surfaces.
- Wipe any spills immediately to prevent stains.
- Interior Cleaning:
- Disconnect the dispenser from power.
- Empty the water reservoir and clean it with a mixture of vinegar and water.
- Rinse thoroughly with water before refilling.

Changing the Water Bottle

1. Remove the empty water bottle by lifting it straight up.
2. Clean the area where the bottle sits to maintain hygiene.
3. Follow the loading steps outlined earlier to install a new bottle.

Checking for Leaks

- Regularly inspect the dispenser for any signs of leaks.
- If leaks are detected, ensure the bottle is seated correctly and check for any damages to the seals.

Troubleshooting Common Issues

Despite its robust design, users may encounter some issues with the Primo Water Dispenser 90013. Here are some common problems and their solutions:

Hot Water Not Dispensing

- Ensure that the child safety lock is disengaged.
- Check if the power indicator light is on; if not, ensure the unit is plugged in and functioning.
- Allow sufficient time for the water to heat up.

Cold Water Not Dispensing

- Confirm that the cold water reservoir is filled properly.
- Check for any blockages in the dispensing mechanism.

Unit Not Cooling or Heating Properly

- Make sure the dispenser is not placed in a hot or humid environment.
- Allow adequate time for the unit to reach optimal temperatures after setup.

Additional Tips for Optimal Use

- Stay Hydrated: Use the dispenser to encourage regular water consumption throughout the day.
- Avoid Overloading: Do not exceed the recommended capacity for water bottles to prevent damage.
- Use Quality Water: Ensure that the water used is clean and free from contaminants to maintain health standards.

Conclusion

The Primo Water Dispenser 90013 Manual provides users with essential information about setup, operation, maintenance, and troubleshooting. By following the guidelines set forth in this article, users can ensure they are utilizing their water dispenser efficiently and effectively. With its convenient features and user-friendly design, the Primo Water Dispenser 90013 is an excellent addition to any home or office, promoting hydration and ease of access to drinking water. Regular maintenance and proper usage will extend the life of the dispenser and enhance the overall user experience.

Frequently Asked Questions

What is the main function of the Primo Water Dispenser 90013?

The main function of the Primo Water Dispenser 90013 is to provide hot and cold water for drinking and cooking, making it convenient for home and office use.

How do I install the Primo Water Dispenser 90013?

To install the Primo Water Dispenser 90013, place it on a flat surface, insert the water bottle into the top, and plug it into a power outlet. Ensure the dispenser is properly leveled.

What type of water bottles can be used with the Primo Water Dispenser 90013?

The Primo Water Dispenser 90013 is compatible with 3 or 5-gallon water bottles, which can be either standard or pre-filled bottles from water suppliers.

Is there a specific maintenance routine for the Primo Water Dispenser 90013?

Yes, it is recommended to clean the dispenser regularly, sanitize the water reservoir every 3 to 6 months, and replace water bottles as needed for optimal performance.

What should I do if the hot water feature of the Primo Water Dispenser 90013 isn't working?

If the hot water feature is not working, check if the dispenser is plugged in, ensure the hot water switch is turned on, and verify that the water

reservoir is filled.

Can I use the Primo Water Dispenser 90013 without a water bottle?

No, the Primo Water Dispenser 90013 requires a water bottle to function, as it dispenses water directly from the bottle into the reservoir.

Where can I find the manual for the Primo Water Dispenser 90013?

The manual for the Primo Water Dispenser 90013 can typically be found on the manufacturer's website or included in the packaging of the product.

What safety features does the Primo Water Dispenser 90013 have?

The Primo Water Dispenser 90013 includes safety features such as a child safety lock on the hot water spout and an automatic shut-off function to prevent overheating.

How do I troubleshoot leaks in the Primo Water Dispenser 90013?

To troubleshoot leaks, check for a properly seated water bottle, inspect for cracks in the reservoir, and ensure that the drain plug is securely in place.

What is the warranty period for the Primo Water Dispenser 90013?

The Primo Water Dispenser 90013 typically comes with a one-year limited warranty, but it's best to check the specific warranty details provided with your purchase.
