2. **Incorporate Games:** Turn flash card practice into a game. For example, you can race against the clock to see how many cards can be answered correctly in a set time.
3. **Encourage Self-Testing:** Allow children to test themselves by looking at the problem side first before flipping the card to check their answer.
4. **Mix Up the Order:** To promote retention, shuffle the flash cards regularly so that children do not memorize the order rather than the facts.
5. **Use Visual Aids:** For visual learners, consider adding images related to the math problems to enhance understanding.
