Enemy Types and Behaviors

These enemies range from standard fighters to elite bosses that require specific tactics to defeat. Recognizing enemy behavior, such as aggression levels and vulnerability windows, allows players to counterattack efficiently. Some enemies may use ranged attacks, while others focus on close-quarters combat, necessitating different defensive and offensive approaches.

Environmental Hazards

The final selection arena is not only populated by enemies but also features environmental hazards like traps, falling debris, and restricted zones. These hazards force players to stay alert and adjust their positioning constantly. Understanding the layout of the arena and anticipating hazard triggers can prevent unnecessary damage and improve survivability.

Gear Selection and Upgrades

Neglecting Resource Management

Failing to manage health, stamina, and other consumables properly can lead to premature defeat. Players should always keep track of their resources and use them judiciously to sustain longer battles.
