It is targeted at Scrum Masters, Agile coaches, and team members who aspire to deepen their expertise and leadership within Scrum environments. Passing the PSM II exam requires a blend of theoretical knowledge and real-world experience, making the use of practice tests an indispensable tool in preparation.

Exam Format and Requirements

The PSM II exam consists of multiple-choice, multiple-answer, and true/false questions that assess a candidate's knowledge across various Scrum domains. The test typically has a time limit of 90 minutes with a passing score around 85%. Candidates must demonstrate proficiency in Scrum principles, servant leadership, team dynamics, and scaling Scrum. The exam is conducted online and is open book, allowing access to the Scrum Guide during the test. Understanding the exam structure is essential to effectively use practice tests as part of a preparation strategy.
