Sample Answers to Common Questions

Here are examples of effective answers to some of the previously mentioned questions.

Behavioral Question Example

Question: Tell me about a time you faced a challenge at work. How did you deal with it?

Answer: "In my previous internship, I was part of a project team that was behind schedule due to unforeseen technical issues. I took the initiative to organize a brainstorming session to identify the root cause of the delays. After discussing with my team, we came up with a revised timeline and delegated tasks based on individual strengths. As a result, we completed the project on time, and our manager praised our teamwork and problem-solving skills. This experience taught me the importance of communication and collaboration in overcoming challenges."

Technical Question Example

Question: What is your understanding of IFRS?

Answer: "IFRS, or International Financial Reporting Standards, are a set of accounting standards developed to create a common financial reporting language across different countries. My understanding is that IFRS aims to enhance transparency, comparability, and consistency in financial statements. For instance, it requires companies to present their financial position, performance, and cash flows in a manner that is understandable for investors and stakeholders. I have studied IFRS during my coursework and have applied it in practical scenarios during my internships."

Situational Question Example

Question: If a client is unhappy with your work, how would you handle the situation?

Answer: "If a client expressed dissatisfaction with my work, my first step would be to listen carefully to their concerns without becoming defensive. I would ask clarifying questions to fully understand their perspective. Once I have a clear grasp of the issues, I would acknowledge their feelings and reassure them that I am committed to finding a solution. I would then propose a plan of action to address their concerns and ensure that they are kept

informed throughout the process. This approach not only helps resolve the immediate issue but also fosters a stronger relationship with the client."
